BALCANO

Ring size measurement

1. Print this page.
2. Check the 100 mm length if that is accurate according to the given instructions.
3. If the size is accurate, cut out the measuring tape and its small cut next to the logo as shown in the illustration below.
4. Thread the tape through the small cut to form a loop, then insert your finger you want to measure.
5. Tighten the tape (not too tight), then read the size.
   This will be the correct ring size to fit the measured finger.
   The scale is marked with a 2 mm steps. For example: 52 mm, 54 mm etc.

40
50
60
70
80

Check this dimension if it is exactly 100 mm!
The ring size measurement will be accurate only in this case.
